Personal statement

I'm an open minded and self-taught person, addicted to programming. I am also very realistic and resilient. I don't have fear of falling down, and if it happens, I will stand up again.

I am flexible and versatile. I can either develop an environment from scratch or I can modify and improve one that already exists. I can adapt perfectly to any circumstances and I like working as a part of a team.

Key Skills

- HTML
- JavaScript
- PHP(OOP)
- LESS
- ExpressJs
- MySQL
- Bootstrap
- GIT
- CSS
- jQuery

- I created the corporate website using WordPress (including the SEO)
- I also managed the web hosting for this REST API in AWS.
- Helping as much as I can to co-workers

Education

Multiplatform application developer

(2015 – 2016)

A complete course where I learnt how to program correctly in a software development environment. Among many things, the main skills that I learnt were Java, Android, Swift, Visual Basic, Abap, SQL. I also learnt the Oriented-Object Programming and Development, all the multiplatform programing bases.

My finally project was a fitness app for android where you can follow your daily routine and diet that you have on the gym. It was developed with native android and SQLite.

Web application developer

(2013 – 2015)

A complete course where I learnt how to program correctly in a web development environment. Among many things, the main skills that I learnt were HTML, CSS, JavaScript, Jquery, PHP, MySQL, Wordpress development and management, ASP.NET and Java. Also I learnt the Oriented-Object Programming and development, management, maintenance of projects with UML and all the web programing bases.

My finally project was a fitness social network where you can upload states, meet new people, add friends, send new messages to this ones and show which sports do you like. It was developed with PHP(OOP), HTML, CSS, JavaScript, jQuery and Ajax.

Hobbies & Interests

I am involved in a lot of personal projects related to applications development because I like to be learning continuously the newest technologies of my environment. I also like read books, do sport, watching series and movies and meet with friends.
